Astrophysics H

Astrophysics H is a semester-long, project-based elective science course that uncovers astrophysics' role in solving the mysteries of the universe. Students explore the uses of the electromagnetic spectrum, methods of observing, dark matter, galaxy formation, black holes, cosmology, stellar nuclear physics, relativity and fundamental particles. Students work collaboratively, build telescopes and spectroscopes, engage in modern problems based on the laws of astrophysics as well as do research based on their own inquiries and contribute to citizen science projects of real-world benefit.

Grades: 9-12 Prerequisite: Physics I
